12 March 2012

Dear Dyanne

12/00688/FUL Erection of a 70m high meteorological mast for a temporary period of 36 months to measure wind speed and direction, East of Aston Brook, Aston Rogers, Worthen

I am writing on behalf of the Shropshire Hills AONB Partnership to object to this application. The mast would create a new intrusive element in the rural landscape of the Rea Valley immediately adjacent to the Shropshire Hills AONB. The only justification or benefit from this structure is in relation to a proposed windfarm development which is of a scale incompatible with the location adjacent to the AONB.

Yours sincerely

Phil Holden
AONB Partnership Manager
